COMMERCIAL EXERCISE EQUIPMENT

NEW PRODUCT HIGHLIGHTS

SP CIRCUIT "STYLE & PERFORMANCE"

Modern Style & Design

The latest computerized laser and CNC machining technology allows our design team to create unique precision components resulting in new and dynamic design styles. In house testing protocols insure that each design demonstrates optimum structural reliability under heavy-duty use. It is this attention to detail that separates the SP Circuit from the competition.

Precise Biomechanics & Ergonomics

Engineering excellence and state-of-the-art 3-D CAD software utilizing parametric modeling assures an accurate anatomical fit and feel your clients will appreciate.

Structural Durability

Exact structural analysis and rigorous testing assure your Paramount equipment will function smoothly under the constant heavy use of today's busy fitness centers.

Low Maintenance Components

Components are specifically designed to minimize your facility maintenance requirements and eliminate unnecessary downtime.

Space Efficient, Low Profile Designs

Streamlined designs reduce your overall floor space requirements while providing a modern, inviting, and easy-to-use strength training atmosphere.

Information Labeling

Easy to follow user instructions and height adjustment guides use color photographs to convey important information and are conveniently located for quick reference.

Investment Value

All Paramount products are competitively priced, quality driven, and backed by the most reliable customer service and support in the industry.
